

MUHAMMAD SYAHIN BIN BAHARUDIN

+60177233144 / +60132952542 | syahinbahar@gmail.com | [SYAHIN PORTFOLIO](#)

SUMMARY

Bachelor's Degree in Software Engineering graduate from Universiti Malaysia Sarawak (UNIMAS). Motivated to learn and grow, with a strong foundation in computer science concepts and hands-on experience in front-end development. Seeking opportunities to leverage software expertise to contribute, continuously learn, and improve through real-world projects in a dynamic and collaborative environment.

EDUCATION

Universiti Malaysia Sarawak (UNIMAS)

Bachelor's Degree in Computer Science (Software Engineering)

CGPA: 3.59/4.00 | Dean's Lister

Kota Samarahan

Oct 2020 - Aug 2024

Universiti Malaysia Sarawak (UNIMAS)

Pre-University (Foundation of Life Science)

CGPA: 3.78/4.00

Kota Samarahan

Jun 2019 - Jul 2020

WORK EXPERIENCE

Telebort Technologies Sdn Bhd

Coding Tutor

Remote

Jan 2025 - Present

- Teach beginner-to-intermediate students core coding concepts using an AI-supported, interactive learning platform to build strong programming foundations.
- Adapt teaching strategies to individual learning styles, improving student engagement and comprehension in remote sessions.
- Support students through 5 hands-on coding projects per program within 6 months, strengthening practical coding and problem-solving skills.
- Simplified complex programming concepts using analogies and real-world examples.

X-Fab Sarawak Sdn Bhd

Apprentice (Software Developer); K-Youth Programme

Kuching

Aug 2025 - Oct 2025

- Assisted senior colleague in creating system process flowcharts for project documentation, providing clarity to the reporting workflow.
- Developed and tested Python ETL scripts to automate email reports with data attachments, reducing manual reporting effort.
- Built and explored Power BI dashboards using views from SSAS models to visualize customer shipping details, ensuring a standardized format across report types.
- Collaborated with team members to debug, test, and improve existing code, ensuring data accuracy and report reliability.

PROJECT

Ship Service for Melexis - Email Report (AIDA, X-Fab project) | Python, SQL, HTML, CSS

- Contributed in updating and improving Python scripts used for automated email reporting, ensuring accurate and reliable content and attachments for Melexis ship details.

PosturePerfect: Deep Learning Application for Poor Sitting Posture Detection (Final Year Project) | Figma, Flutter, Dart, Google ML Kit Pose Detection, Android Studio

- Leveraged existing pose estimation AI model to create mobile application for poor sitting posture identification and alarm for prolonged sitting duration.

Sarawak Pay UI/UX redesign (University project) | Figma

- Improved flow, readability, usability, and overall user experience by redesigning Sarawak Pay user interface and creating high-fidelity design and prototypes.

CERTIFICATE

CompTIA Cloud Essentials+ Certification

Issued by CompTIA, 2025

Google UX Design Professional Certificate

Issued by Google via Coursera, 2024

Google Cybersecurity Professional Certificate

Issued by Google via Coursera, 2024

SKILLS AND LANGUAGE

Technical skills:

Programming - Python, SQL

Web Development - HTML, CSS, JavaScript, PHP, Node.js, Firebase

Data & Analytics - Power BI, SQL, SQL Server Management Studio

Tools & Deployment- Git/GitHub, Figma, Adobe XD, VS Code, Power BI, Antigravity

Languages: English (Professional working proficiency); Malay (Native proficiency); Melanau (Native proficiency)
